TO THE

MATHEMATICAL GAZETTE

No. 227, FEBRUARY 1934—No. 231, DECEMBER 1934.

COMPILED BY MRS. T. A. A. BROADBENT.

1. Articles.
2. Mathematical Notes.
3. Reviews and Notices.
4. News of Branches.
5. Gleanings Far and Near.
6. The Pillory.
7. The Library.
8. Obituary Notices.
9. Correspondence.
10. Miscellaneous.

ARTICLES, ETC.

AUTHOR.	TITLE.	PAGE.
E. J. Atkinson.	The slide rule in the teaching of logarithms and indices.	108
S. Barnard.	The operators E and Δ .	30
R. M. Carey.	Geometry in secondary schools.	217
M. L. Cartwright.	Mayer's method of solving the equation $dz = P dx + Q dy$.	105
G. T. Clark.	Mathematics in central schools.	80
	Discussion : A. W. Riley (p. 86) ; J. Burdon (p. 92) ; H. S. Newman (p. 93) ; R. Hoyle (p. 94) ; W. F. Bushell (p. 94) ; G. N. Watson (p. 94).	
J. Clemow.	A note on isogonal conjugates.	289
H. M. Cook.	Broadening the basis of study in arithmetic.	192
L. Crawford.	Determination of the foci, directrices, axes and eccentricities of a conic whose equation is given with numerical coefficients.	43
T. R. Dawson.	Isotomically conjugate quadrilaterals.	186

AUTHOR.	TITLE.	PAGE.
R. A. Fisher.	Randomisation, and an old enigma of card play.	294
N. M. Gibbins.	The eternal triangle.	95
	Extensions and implications of Simson's line.	311
	Generalisation of Plücker's theorem.	315
H. R. Hamley.	The function concept in school mathematics.	169
	Discussion :	
	W. Hope-Jones (p. 178); E. H. Neville (p. 179); G. N. Watson (p. 179).	
E. H. Hankin.	Some difficult Saracenic designs. II. A pattern containing seven-rayed stars.	165
R. A. M. Kearney.	Results of Relativity without the theory of Tensors.	145
B. E. Lawrence.	Introductory theorems in geometrical conics.	223
W. H. McCrea.	British Association, 1934. Mathematical and Physical Transactions.	298
G. C. McVittie.	Edinburgh Mathematical Society: St. Andrews Colloquium.	248
W. Miller.	Theory of exponential and logarithmic functions and their derivatives.	40
V. Naylor.	The sum and product functions.	65
E. H. Neville.	Congruence and Parallelism.	23
	The tracing of cubic curves.	258
H. Orfeur.	On recurring continued fractions.	35
H. Peat.	A graphical treatment of algebraic equations.	180
B. M. Peek.	Pansymmetrical pencils.	19
H. E. Piggott.	Some ideas on energy and momentum.	228
G. Temple.	Differentials.	68
	Discussion :	
	J. T. Combridge (p. 70); C. O. Tuckey (p. 74); A. Robson (p. 75); W. F. Sheppard (p. 75); G. N. Watson (p. 76); G. W. Ward (p. 76); D. E. Collier (p. 76); C. G. Paradine (p. 76); W. Hope-Jones (p. 77); J. T. Combridge (p. 77).	
V. Thébault.	Sur le triangle isocèle.	255
G. F. P. Trubridge.	The statistical theory of turbulent motion.	300
G. N. Watson.	Presidential Address, 1934. Scraps from some mathematical note-books.	5
	A problem of distribution.	245
E. M. Williams.	The geometrical notions of young children.	112
	Annual Meeting of the Mathematical Association, 1934.	1
	Report of the Council for the year 1933.	2
	The organisation and interrelation of schools. Mathematics. Memorandum from the Mathematical Association.	250

INDEX

MATHEMATICAL NOTES.

AUTHOR.	No.	TITLE.	PAGE.
N. Altshiller-Court.	1100	A bibliographical note.	120
N. Anning.	1108	The envelope of the Simson lines of a triangle.	199
A. A. Krishnaswami Ayyangar.			
	1127	Conormal points on an ellipse.	324
W. F. Beard.	1126	Two theorems on the geometry of the triangle, leading to a proof of Feuerbach's theorem.	322
W. J. Dobbs.	1110	The middle points of the three diagonals of a complete quadrilateral.	200
G. H. Grattan-Guinness.			
	1122	Note on the " Alternate Segment " theorem.	276
T. W. Hall.	1121	Construction for the length of a circular arc.	275
G. H. Hardy and J. E. Littlewood.			
	1104	A problem in elementary probability.	195
P. J. Heawood.	1107	The envelope of the Simson line.	198
S. G. Horsley.	1117	On Note 1098.	271
R. C. J. Howland	1113	The equations for the foci of a conic.	267
G. H. Lester.	1111	The curvature of a plane curve.	200
J. E. Littlewood.		See G. H. Hardy.	
A. Lodge.	1119	The definition of the logarithm.	272
H. V. Lowry.	1109	The triple vector product.	199
	1118	Small oscillations of a body with one degree of freedom.	272
R. J. Lyons.	1125	Note on the Tetrad whose opposite joins are conjugate lines with regard to a given quadric.	321
A. F. Mackenzie.	1112	Two definite integrals.	267
	1123	Solution of $x^4 + bx^3 + cx^2 + bx + 1 = 0$.	277
S. H. Moss.	1115	To invert the vertices of a triangle into those of an equilateral triangle.	270
V. Naylor.	1102	Unit torque, unit angular momentum and the hypothesis of homogeneity.	122
E. H. Neville.	1105	Legendre again.	195
	1106	Stop. Caution. Go.	196
	1124	Bernoulli's differential equation.	321
H. W. Oldham.	1101	The teaching of logarithms.	120
J. Peacock.	1103	Proof of a theorem in permutations.	124
S. M. Plotnick.	1116	Purser's theorem.	271
W. Soller.	1114	Stokes's integral theorem : a direct consequence of integrating the conjugate differential dyadic.	268
D. M. Y. Sommerville.	1099	Oscillating sequences.	49
T. S. Tufton.	1120	$ABCDEFGH$ is a regular heptagon in a circle of unit radius · to prove that $AC + AD - AB = \sqrt{7}$.	274
A. G. Walker.	1098	A generalisation of the Frézier point.	48
G. Wotherspoon.	1097	To find the triangles of which a given triangle is Brocard's second triangle.	47

REVIEWS AND NOTICES.
